

Aquatherm Lilac Recycled/Reclaimed Water Pipe

Aquatherm lilac is now available in the fusiotherm range of pipes and fittings and in accordance with NZS 7702 is specifically coloured and manufactured for recycled water application based on AS/NZS 3500 .1.2003 section 9.5.2.

Lilac Pipe is now available for distribution.

Adopted and regulated in Australia (Sydney water attachment notice to plumbers) and now active here in NZ to clearly identify throughout the building non-drinking water services and their outlets.

These services are now in common practice in "Green Build" applications, institutional buildings schools and hospitals.

Pipes are manufactured in SDR 7.4 dimensions 20 and 25mm for branch line distribution (pressure rating confirms an ambient temperature service life of 50 years at 20 Bar.)

Dimensions 32, 40, 50 and 63 are manufactured in SDR 11, which confirms an ambient temperature service life of 50 years @ 12.9 Bar to DIN 2000. The material is Fusiole PP-R to insure it is fully compatible for socket fusion connection to the fusiotherm fitting range; processes and manufacturing are of sound environmental choice.

Pressure classes are based on ISO 10508. Identification is clearly marked on the pipes for "RECYCLED/RECLAIMED WATER - DO NOT DRINK."

Lilac Pipes will be included under BRANZ Appraisal 539 for fusiotherm piping systems.

Dimensions 75mm to 250mm will also be manufactured and will be available ex Germany (lead in time of approx 8-10 weeks for projects on these larger dimensions.)

Article Number	Pipe and Dimensions
9010808	SDR 7.4 20 x 2.8mm
9010810	SDR 7.4 25 x 3.5mm
9010212	SDR 11 32 x 2.9mm
9010214	SDR 11 40 x 3.7mm
9010216	SDR 11 50 x 4.6mm
9010218	SDR 11 63 x 5.8mm
